

Welding Blanket Datasheet

Product Code: RC0383-2245

Product Description

Welding blankets are crafted using a base fabric of glass cloth, which is then treated with an ultra-fine mineral-based aqueous dispersion. Similar to Vermiculite glass cloth, this treatment results in a coating of platelets that, when exposed to high temperatures, liquefy to form a protective layer over the base fabric.

Technical Specification

Property	Value
Material	Textured E Glass Fabric
Weave	3 x 3 Stepped Twill
Finish	Mineral based aqueous dispersion.
Weight (g/m ²)	2245
Thickness (mm)	2.6mm
Cloth Construction: Ends / dm Picks / dm	66 70
Tensile Strength: Warp (N / 50mm) Weft (N / 50mm)	4700 5000
Roll Length (m)	25m
Roll Width (mm)	1000mm
