

Graphite Coated Glass Cloth Datasheet

Product Code: RC0386-2060

Product Description

Graphite coated glass cloth is created by treating glass cloth with a mineral-based aqueous graphite dispersion which results in a coating of platelets that, when exposed to high temperatures, liquefy to form a protective layer over the base fabric.

Abrasion-Resistant

High Temperature

Durable

Technical Specification

Property	Value
Description	Textured E Glass Fabric with Graphite Treatment
Colour	Dark Grey
Features and Benefits	In comparison to equivalent E glass products, Graphite Coating provides: <ul style="list-style-type: none"> - Increased upper temperature operating limit - Increased flex endurance - Superior resistance to vibration induced damage - Enhanced resistance to direct flame contact
Weave	3 x 3 Stepped Twill
Finish	Graphite Finish
Weight (g/m ²)	2060
Thickness (mm)	2.6mm
Service Temperature	<600°C continuous. <1000°C short term (withstands contact heat from a propane flame for several minutes)
Roll Width (mm)	1000mm
Roll Length (m)	25m
